Release of GMG RipServer 4.9

Release date

GMG RipServer 4.9.0.26 has been released today, Tuesday, July 11, 2017 for use on 64bit operating systems.

GMG RipServer 4.9.0.25 has been released today, Tuesday, July 11, 2017 for use on 32bit operating systems.

License

GMG RipServer 4.7/4.8 → 4.9 New license required, chargeable

Supported operating systems

- Windows 10
- Windows 8.1
- Windows 7
- Windows Server 2012
- Windows Server 2008 R2

Download

[RipServer 4.9](#)

Installation

1. Close RipServer 4.7/4.8
2. Extract the zip archive and run the setup file enclosed.

The installation instructions are valid for new installations as well as updates. We recommend creating an environment backup of your previous version (System > Create environment backup) prior to installing GMG RipServer 4.9.

New Features

Updated Adobe Print Engine 4

GMG RipServer 4.9 uses the same RIP engine as ColorProof 5.9, ensuring consistent results in your Proof and Rip.

Resolved issues

The following technical issues have been resolved in RipServer 4.9.0.25/26. Please note that the list describes the problem, not the solution.

Windows Printer Spooler (64bit OS)

The Windows printer spooler could not be activated in a RipServer workflow on 64bit operating systems. [69802]

Multipage PDF

Some specific multipage PDFs were not correctly processed. One or more pages went corrupt during processing. [29466, 54865]

Threshold value for "Force Black Overprint" ignored

The threshold value for text and vectors, which can be defined for the "Force Black Overprint" setting, was ignored. [63662]

Limitation

Please check before the installation whether AppService V1 or V2 is installed on the system. GMG RipServer only starts in combination with AppService V1.

Check here which version is installed:

Control Panel > Programs and Features > ...

1. AppService V1 e.g. AppService 1.2.403.0 → GMG RipServer 4.9 can be installed
2. AppService V2 e.g. AppService 2.0.106.0 → Please contact support@gmgcolor.com

End of life

Please note that we will no longer provide bug fixes, maintenance releases, workarounds or patches for bugs found in GMG RipServer 4.8 or earlier versions.

Build number

GMG RipServer 4.9.0.26 (64bit)

GMG RipServer 4.9.0.25 (32bit)

Questions? Feedback? Comments? Please, let us know!

With kind regards from Tübingen
