

GMG SupportNews

English edition 4/2016

February 29, 2016

Dear Sir or Madam,

Today we inform you of the following topics:

- GMG ColorProof 5.7.2 – Service Release
- Resolved issues
- End of Life
- Build Number
- End-of-Service-Life (EOSL) for ColorProof-Version 5.4

GMG ColorProof 5.7.2 –Service Release

Release date

ColorProof 5.7.2.529 has been released for use on 64bit operating systems today, Monday, February 29, 2016.

ColorProof 5.7.2.530 has been released for use on 32bit operating systems today, Monday, February 29, 2016.

License

ColorProof 5.0 - 5.6.1 → 5.7.2 New license required, chargeable

ColorProof 5.7.0 → 5.7.2.529/530 No new license required

Download

[GMG ColorProof 5.7.2](#)

Download files

The new installer 5.7.2 consists of 3 parts:

- ✓ Prerequisites: Contains additional third party system components
- ✓ Application: Contains the GMG ColorProof applications
- ✓ Data: Contains all official GMG ProofStandards, calibration and spot color sets.

Internet

Internet connection of the ColorProof-PC is recommended for new installations and for updates.

ColorProof version 5.7.2 and higher downloads only the required official GMG profiles, calibrations and spot colors from the GMG Cloud.

Installation on systems with internet access

Required download files:

- ✓ Prerequisites
- ✓ Application

Installation instructions:

1. Before updating an existing configuration (5.5 or newer): create an environment backup and after that fully close the application.
2. Prerequisites: Extract the zip archive and run the setup file prerequisites.exe enclosed.
3. Application: Extract the zip archive and double-click to run the setup file (32bit or 64bit).
4. Start ColorProof once the installation wizard is closed.
5. ColorProof is now updated/installed. The installation files can be removed.

Installation on systems without internet access

When installing ColorProof 5.7.2 on systems without internet connection, please download all three installation files:

- ✓ Prerequisites
- ✓ Application
- ✓ Data (CP5_Data_5.7.2.pkg)

Steps for offline installation:

1. Copy all installation files and extract only the first two zip-files (prerequisites and application).
2. Before updating an existing configuration (5.5 or newer): create an environment backup and after that fully close the application.
3. Start the prerequisites.exe
4. Start the application.exe
5. Start ColorProof once the installation wizard is closed.
6. ColorProof is now updated/installed. The installation files can be removed.

Resolved issues

The following technical issues have been resolved in ColorProof 5.7.2.529/530. Please note that the list describes the problem, not the solution.

Active drying works only while printing

The active drying of proofs worked only while the job was still printing. The result was, that the last few centimeters of jobs were not dried properly. This affected mainly the inline validation of control strips placed in that area. [61099]

Workflow (51L) with control strip for ILS25 could not be created.

Creating workflows using ProofStandards containing only M1 data in ProofControl standards was not possible with Canon imagePROGRAF series printers with embedded measurement device (ILS25). [60570]

Calibrating custom media with GMG Driver 8c 720dpi aborted with error

The auto calibration of an Epson Stylus Pro x900 printer with custom media in mode GMG Driver 8c 720dpi V2 aborted with error "Auto-calibration failed: Test chart could not be printed: Unexpected end of printing". This error did not affect other print modes (e.g. any 10c mode or 8c 720x1440dpi). [60880]

Changes to Dot Gain and Printer Linearization settings not saved in ProfileEditor

Changes made in the "more parameters" tab to the Dot Gain and Printer Linearization were not saved. This issue affected both the "save" and "save as..." functions. [60851]

End of Life

Please note, that we will no longer provide bug fixes, maintenance releases, workarounds, or patches for bugs found in 5.7.2.46x or older.

Build-Number

ColorProof Version 5.7.2.529 (64bit)

ColorProof Version 5.7.2.530 (32bit)

End-of-Service-Life (EOSL) for ColorProof-Version 5.4.2

We hereby announce the End of Service Life (EOSL) for ColorProof Version 5.4.2. The End of Service Life means, that, effective immediately, support calls via the Service Hotline, email or the Trouble ticket system will no longer be accepted and all support has been discontinued for the above products and versions.

Support for the following expired version will continue until further notice:

- ColorProof 5.7
- ColorProof 5.6
- ColorProof 5.5

Questions? Feedback? Comments? Please, let us know!

With kind regards from Tübingen
